

We are seeking for our headquarters in Heidelberg a highly motivated

## Software Developer (m/f/d)

**As a member of the “Product Development Team”, you will have the following tasks:**

- Participation in technically and content-wise demanding software development projects using the SAP HANA stack
- Conception and development of web applications which prepare and present information from the fields of biology, chemistry and medicine
- Analysis and implementation of requirements from the product management, if necessary, with contributions of scientists from the Molecular Health Research Department

### Your skills and qualifications

- At least five years of experience in development of software applications
- Good understanding and experience in object-oriented and functional programming
- Profound experience in development of modern and high-performance web applications by using:
  - Frameworks (e.g. SAPUI5, AngularJS or Node.js)
  - Design and implementation of web services (REST, ideally ODATA and JSON based)
  - Design of effective database models
  - Design patterns and functional paradigms
- Keen interest in designing and implementing of user stories as full-stack developer
- Familiar with the common development tools (GitLab, mercurial, grunt, etc.)
- Ability to work independently, focused, goal- and team-oriented
- Full English proficiency

## We offer

- An innovative, exciting international company that values employees who can think outside of the box, who want to make a difference and strike out in a new direction
- A challenging, stimulating scientific and professional environment with a focus on innovation and on the continuous development of our company
- A modern working environment in a new office building
- A multicultural team and attractive company events, together with an open culture of trust
- Excellent location in the center of Heidelberg
- Opportunities for personal development in a global company
- Competitive compensation and attractive benefits package, flexible working models
