

## Curriculum vitae

### Dr. Stephan Brock

Dr. Stephan Brock is Chief Technology officer at Molecular Health and member of the Executive Board.

He has worked in several leading positions in the bioinformatics industry focusing on data integration, text-mining, and content management supporting the pharmaceutical R&D value chain.

As head of development and CEO of Metalife AG, Dr. Brock led a team of 70 analysts, scientists, and software developers dedicated to the design, development, and delivery to market of a fully integrated, end-user focused bioinformatics product portfolio.

In 2004, Dr. Brock established a new business unit at LION Bioscience focusing on a solution for process and portfolio management in the pharmaceutical industry integrating the R&D value chain from early discovery to clinical studies.

As CTO of Life Biosystems he successfully conducted large scale data integration projects for cancer centers in the US. He led the design and implementation of a center wide clinical trials data management solution at the largest US cancer center.

As CTO of Molecular Health, he is driving the development of a suite of technologies and software applications that leverage molecular evidence to support decision-making for precision medicine across the healthcare system and industry. Dr. Brock received a Ph.D. in biochemistry from the University of Bayreuth.
